It all started with a meeting

A journey • A purpose

Make a difference

In 2002, a group of friends set out to climb Pico da Neblina. On their way back, they passed through a Yanomami community and there they had an encounter that would change everything.

From a group of friends to an impactful structure.

Since 2003, transforming intention
into reality with the Health Expeditionaries.

What do we do?

We bring a state-of-the-art mobile hospital complex to places where access to healthcare is most challenging.

An aerial photograph of a small village nestled in the heart of the Amazon rainforest. The village is situated on a peninsula or a bend in a wide, calm river. The surrounding landscape is a dense, lush green forest. The village itself consists of several small, simple houses with light-colored roofs, some larger buildings, and a few open areas. A dirt road or path winds through the forest towards the village. The river is a deep blue color, reflecting the sky. The overall scene is peaceful and remote.

A complex and integrated operation in the heart of the Amazon rainforest.

The care that respects

**Access to healthcare
transforms lives.**

**That's why every action we take goes far
beyond just providing care:** we combine fully
equipped operating rooms with a dedicated team of
specialists.

The right to see

A mother of two, Daniele lived in darkness caused by total cataracts. She only knew her youngest child, just 2 years old, by touch and voice.

After being operated on by our team, Daniele was finally able to look into the eyes of her son, whom she had never seen before.

The team that makes it all happen.

+300 volunteers

Doctors, nurses, and a multidisciplinary team driven by the desire to transform.

FUNDATION

**For whom do we exist
and Why do we exist?**

We exist for the Guardians of the Forest

Indigenous peoples of the Amazon.
Protagonists of their own history.

A satellite map of the Amazon region, showing a large, dark green area in the center, likely a protected area or a large body of water. The surrounding landscape is a mosaic of green and brown patches, indicating a mix of forest and cleared land. The text "We exist to contribute to the preservation of the Amazon." is overlaid on the left side of the image.

**We exist to contribute
to the preservation of
the Amazon.**

We want to be an ecosystem with an ever-greater impact.

Blindness, low vision, hernias, infections and accidents in the forest: our role is to transform and improve the lives of those who protect it.
